## Fullstack Engineer

### My Self

I'm a passionate Software Engineer with expertise in Java and Python. I excel at crafting efficient code and solving complex problems. With a solid foundation in algorithms and a commitment to excellence, I thrive on continuous learning and collaborative efforts to deliver high-quality solutions. My experience has equipped me with the skills and knowledge to tackle diverse challenges in the world of software development.

### Projects

#### Todo list

Backend Engineering [Github Link](#)

Todo List is a spring boot project that mimic a todo list where users cankeep tracks for the list of things to be done on the nearest times tocome

- **Technology used:** Spring Boot, Postgres, JPA, JDBC
